Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In so far as the directors are aware:

## NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 May 2014

---

### 1. PRINCIPAL ACCOUNTING POLICIES

#### BASIS OF ACCOUNTING

The financial statements have been prepared under the historical cost convention, and in accordance with applicable UK accounting standards.

The principal accounting policies of the company have remained unchanged from the previous year.

#### CASH FLOW STATEMENT

The directors have taken advantage of the exemption in Financial Reporting Standard 1 (revised): Cash Flow Statements, from including a cash flow statement in the financial statements on the grounds that the company is wholly owned and its ultimate parent publishes a consolidated cash flow statement.

#### TURNOVER

Turnover is the total amount receivable for goods and services provided, net of VAT and trade discounts. In the case of long term contracts, turnover represents the sale value of work done in the year.

#### FIXED ASSETS

All fixed assets are initially recorded at cost.

#### DEPRECIATION

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows:

Plant & Machinery - over 3 to 8 years (straight line)

Motor Vehicles - over 3 to 4 years (straight line)

#### OPERATING LEASE AGREEMENTS

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged against profits on a straight line basis over the period of the lease.

#### PENSION COSTS

The company contributes to the personal pensions of certain employees. Contributions are charged to the profit and loss account as incurred.

#### DEFERRED TAXATION

Deferred tax is recognised in respect of all timing differences where the transactions or events that give the company an obligation to pay more tax in the future, or a right to pay less tax in the future, have occurred by the balance sheet date. Deferred tax assets are recognised when it is more likely than not that they will be recovered. Deferred tax is measured on an undiscounted basis using rates of tax that have been enacted or substantively enacted by the balance sheet date.

#### FINANCIAL INSTRUMENTS

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities.

Where the contractual obligations of financial instruments (including share capital) are equivalent to a similar debt instrument, those financial instruments are classed as financial liabilities. Financial liabilities are presented as such in the balance sheet. Finance costs and gains or losses relating to financial liabilities are included in the profit and loss account. Finance costs are calculated so as to produce a constant rate of return on the outstanding liability.

Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited direct to equity.

### 1. PRINCIPAL ACCOUNTING POLICIES *(continued)*

#### LONG-TERM CONTRACTS

Turnover and related costs on each long-term contract are recorded in the profit and loss account as contract activity progresses. Turnover is calculated on the basis of the value of the work done. Attributable profit is calculated for each contract by reference to the contract's cumulative turnover, total contract value and total profit estimated for the completed contract. Full provision is made for losses on a contract immediately they can be foreseen. In the balance sheet, the value of work completed at the year end for which no sales invoice has been raised or no certification paid is included in amounts recoverable on long-term contracts.
