

Bristol Harbourside

Project Description:

Churngold's work package included the upgrade of the main arterial road into Bristol City centre and the installation of a new adoptable highway, including footpaths and landscaping for the £700m Bristol Harbourside Development.

Key Works carried out:

Groundworks: Installation of new services and drainage to new building plots around the site and to upgrade the existing services and drainage to surrounding buildings.

Surfacing: Upgrade of main road surfacing as well as preparation and installation of new access road surface. Churngold also carried out block and slab paving around the pedestrian areas and prepared and installed the street furniture.
